### **DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Specification***

2. The disclosure is objected to because of the following informalities: References to claims are generally forbidden because claims usually do not stay the same during prosecution. They may be amended or canceled which would render references to the claims meaningless or inaccurate. Thus, the reference to claim 1 at page 8, line 7 should be removed or amended where claim 1 is no longer part of the description.

Appropriate correction is required.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Response to Arguments***

4. Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Fraser et al (US 6,172,135 or W096/37531) as set forth in the last office action and further discussed below.

5. Applicant argued that the particle size taught by the prior art reference is lower than the particle-size range of the claimed invention. It should be noted that the particle diameter within the range of 250 to 320nm in the reference is reported as "preferably" for 'superior optical properties' (Fraser, col. 4, lines 27-34). Therefore, the particle

Art Unit: 1794

diameter of the Fraser patent covers diameter outside the preferred range of 250 to 320nm. Alternatively, it would have been obvious to produce particle size of various ranges depending on the end-use of the particles.

6. Applicant's arguments filed October 16, 2008 have been fully considered but they are not persuasive for reasons set forth above.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
